Luke Nemy

Jr Software Engineer, Wordpress Freelancer, Autodidact
Alameda, California

Experience

Learners Guild
Software Enginner Apprentice
March 2017 - October 2017 (8 months)
Oakland, Ca

Weekly projects creating Full-stack apps using Node.js and Express; Projects included reverse engineering the JavaScript Lodash library, implementing SQL databases and utilizing template engines such as Pug, Handlebars, EJS. With an emphasis on learning in-team while prioritizing individual material retention, we employed various strategies to optimize learning so that our habits can be adaptable as the ever-changing field of tech.

As a Learner, I was apart of a dynamic environment where the menu of opportunities upon completion is not pre-set; my learning path was decided by me and I built my skills toward becoming a dynamically inclined software developer.
